STATEMENT

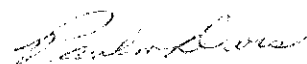

On 8 February 1969 I was the number 3 man in a flight of 4 F-100D aircraft. We had been receiving 23mm fire - light to moderate. The flight ahead of us had been receiving light to moderate 23mm cannon fire. Approximately 20 to 40 air bursts had been seen. We were making an ordnance delivery against an AAA site. I had just completed my bomb delivery when I heard the FAC (Stormy 03) call "Good Show Four", and I looked back to see if I could see number four's bombs impact. Then I heard number four call "Off Left". Approximately five seconds after he called I started looking for number four so I could aid in his join up with the rest of the flight. Approximately 3 seconds later after I started looking I visually acquired number four and noticed that he was in a left turn, and appeared to be turning to join up with the rest of the flight. Almost immediately after I saw him the aircraft started a turn to the right and then rolled upside down, leveled off upside down momentarily and then started a series of wing rolls to the right. He crashed almost straight down. I advised the flight lead that number 4 had just crashed. Flight lead flew back and saw the smoke coming from the crash site. We then circled the area listening for beepers and searching for a parachute. FAC also joined in the search for any indication that the pilot had parachuted. We stayed in the area approximately 8 minutes, until reaching bingo fuel and departed the area. The FAC remained in the area continuing the search. At the time we left no indication had been received on the beeper or emergency radio, nor had we seen a parachute. The aircraft exploded upon impact. When I first observed number four I realize now that the aircraft must have been out of control. From the time I first saw him, the aircraft was not out of my sight until the crash.

STATEMENT

I was the leader of Sun Valley 31, a flight of four F-100s from the 37th Tactical Fighter Wing. The flight took place 8 February 1969, departing Hu Cat Air Base at 0818 hours. Captain Clark had made a single pass on a previous target shortly before we proceeded to the gun position. His ordnance on the first target was two MK-117 low drag bombs. They were dropped in pairs. Sun Valley 31, myself and Sun Valley 33 had dropped four MK117 bombs in three passes on the first target, an interdiction point. On my second pass the FAC (Stormy 03) stated I had taken about 10 rounds of what appeared to be 37mm ground fire. I did not see this, I did observe what might have been tracers off my left wing.

We then proceeded to the AAA site and covered a flight of two F-4s while they expended their ordnance on the site. When they departed we rolled in to expend number two and number four's GBU-24s. I strafed, number two dropped his GBU24 short, number three strafed and number four dropped his GBU24 on the target. The FAC called "Good Show Four" (the GBU was right on the target area). Captain Clark called "Off Left". By this time I had located number two closing on us, number three farther astern and began looking for number four. At this time number three called that number four, Capt Clark, had "just gone in". I tightened up my turn and immediately picked up the fireball on the ground. I called the FAC and the rest of the flight to "GUARD" channel and initiated rescue efforts. I saw no parachute at any time nor did any of us hear any further transmissions from Captain Clark. We did not pick up a beeper at any time. We orbited the target area 5 - 10 minutes and because of bingo fuel were forced to leave. The weather was clear, visibility a minimum of 5 - 7 miles. I might comment that this was not our frapped target, but we were diverted by INVERT control.
